

Memorandum

Subject:

Enforcement of Motor Carriers'

Self-Certification of Compliance with the

Motor Vehicle Safety Standards

From:

Associate Administrator for

Enforcement and Program Delivery

To:

Field Administrators

Division Administrators

In Reply Refer To: MC-ECE

AUG 2 6 2005

Date:

The purpose of this memorandum is to provide policy guidance to increase highway safety by ensuring that all commercial motor vehicles (CMV) are certified by the vehicle manufacturer or registered importer as complying with all applicable Motor Vehicle Safety Standards in effect at the time of manufacture. This policy is summarized in table format in Attachment 1.

In particular, and in anticipation of the United States (U.S.) and Mexico finalizing NAFTA longhaul cross border operations, Title 49 of the Code of Federal Regulations requires both Mexicodomiciled carriers applying for authority (Form OP-1(MX)) to operate beyond U.S. municipalities and commercial zones on the U.S.-Mexico border as well as Mexico-domiciled carriers applying for a certificate of registration (Form OP-2) to operate in municipalities or commercial zones on the border, to certify, as part of the application process, that they are in compliance with the Federal Motor Carrier Safety Regulations (FMCSRs), the Hazardous Materials Regulations, and the Federal Motor Vehicle Safety Standards (FMVSS). If FMCSA or State inspectors determine through vehicle inspections or during a pre-authority safety audit that Mexico-domiciled motor carriers are operating vehicles not in compliance with the applicable Motor Vehicle Safety Standards, FMCSA may use this information to deny, suspend or revoke a carrier's operating authority or certificate of registration for making a false certification or issue appropriate penalties for the falsification.

CMVs manufactured to meet United States or Canadian safety standards, and displaying a Vehicle Identification Number (VIN) that meets National Highway Traffic Safety Administration's (NHTSA) or Canada's requirements, are considered to be in compliance. In addition, FMCSA determined, based on information from the Truck Manufacturers Association (TMA), that most model year 1996 and later CMVs manufactured in Mexico meet the FMVSS regardless of whether the vehicle bears FMVSS certification labels. For vehicles which do no have certification labels, it has been determined that enforcement officials should defer to the

VIN on a plate or plates in various locations on the vehicle. The VIN will assist the inspectors in determining what year the vehicle was manufactured to determine compliance with the FMVSS or Canadian Motor Vehicle Safety Standards (CMVSS). Attachment 2 provides a sample VIN plate, including instructions on how to read the VIN to determine year of manufacture.

No adverse action will be taken against vehicles operated by Mexico-domiciled motor carriers with labels certifying compliance with the CMVSS in effect at the time of manufacture. With only a few differences, the Canadian motor vehicle safety standards are identical to the U.S. manufacturing performance standards (the FMVSS), and FMCSA's operating regulations incorporate the FMVSS critical to continued safe operation.

Regardless of whether a vehicle has a certification label, vehicles with violations of the FMCSRs that are serious enough to meet the current out-of-service criteria are to be placed out of service. FMCSA will continue to impose civil penalties for violations of Part 393 of the FMCSRs concerning parts and accessories necessary for safe operation, including regulations that cross-reference the FMVSS. For your convenience, we have included the attached chart (see Attachment 3) which cross references the FMCSRs with the FMVSS.

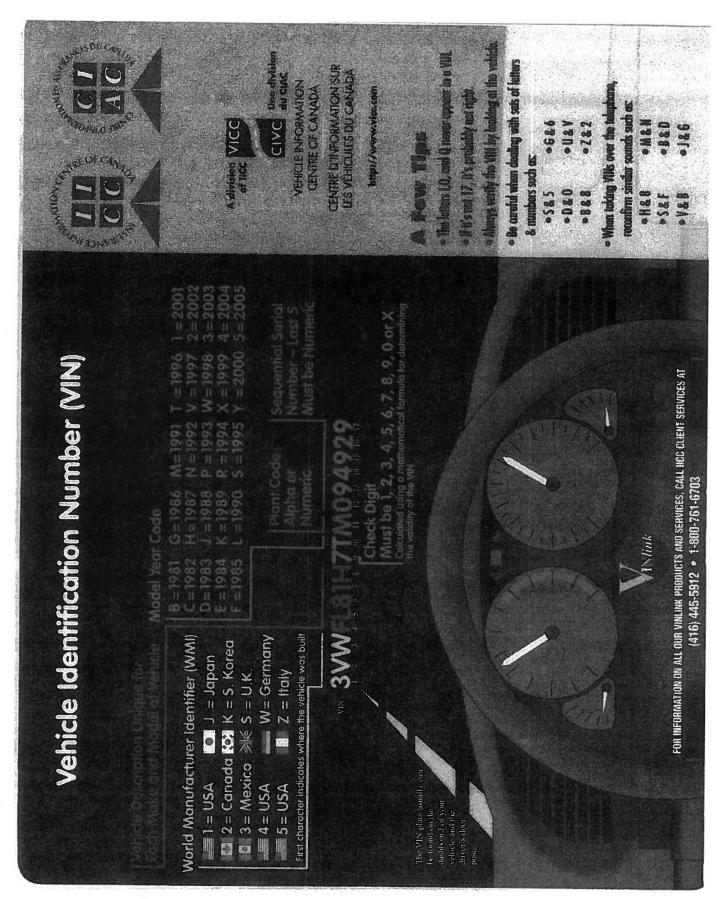

The Office of Enforcement and Compliance is working with the Office of Information Systems to establish system requirements and operational procedures for implementing the policy This policy will become effective when these guidelines have been established and modification the appropriate software and Motor Carrier Management Information System have been completed. Further guidance will be forthcoming.

I encourage you to work closely with your State Motor Carrier Safety Assistance Program (MCSAP) partners as we implement this policy. If you have questions or need additional information, please contact Mary Pat Woodman at marypat.woodman@fmcsa.dot.gov or by (202) 366-6333.
